The image shows a rectangular blue PCB with orange solder mask. The board is heavily corroded, with large areas of white and grey residue covering the surface. The corrosion is particularly prominent in the center and along the edges. The board is labeled with the text 'T210-3126-V1.0 BGA 2018.07.09'. It is placed on a light blue surface next to a ruler for scale. The ruler shows measurements in millimeters (0 to 100 mm) and inches (0 to 10 inches). The board is oriented horizontally, with the ruler placed vertically to its left. The board has several components, including a small black component on the left, a small white component in the center, and a small black component on the right. The board is connected to a red and black cable on the right side.
